

Goderich Port Management Environmental Policy

Goderich Port Management Corp.
Subject: Environmental Policy
Type: Communications
Prepared by: Rowland Howe - President
Effective Date – 13 March 2023

Ports, by their nature, are in close proximity to highly sensitive resources, and are under increasing scrutiny by the environmental community — both by the regulators and public/private interest groups.

The port activities will be intended use best practices to minimize the impact of operations on the environment and will be managed accordingly.

We strive to understand and measure the impact our activities may have on the surrounding environment.

The Port of Goderich is a member of the Green Marine alliance, participants benchmark their annual performance, have their results accredited by an external verifier, and publish their results.

Our results will be posted on the Goderichport.ca website.

Rowland Howe

President; Goderich Port Management Corp.
